- Ideal for Large and Small Properties

## TV LAYOUT

## CABLE LAYOUT

## ROOM AUTOMATION LAYOUT

## DVD LAYOUT

## Create Custom Remote Controls for any Guestroom

Improve your guest experience by providing an intuitive remote control that is specifically designed for your rooms. Simplify the design by removing unnecessary keys from the original remote and consolidate multiple remotes into a single and easy to use device. Reduce theft and increase brand awareness with the addition of a property logo. Reduce battery replacement costs with a locking battery door. An ideal solution for both large and small properties.

The HRC-540 can be easily customized for use at a specific property. The original remotes would be submitted to Celadon, along with a simple worksheet to define the button layout and graphic design. Celadon will provide samples to test and confirm the functionality of the device, as well as an artwork proof for the final design. Upon approval of the samples and artwork, Celadon can then begin to fulfill orders within a few weeks. Reorders can be made at any time!

**For more information about the HRC-540 or to create your own custom remote control, please contact Celadon by phone at 415-472-1177 x 201 or by email at [sales@celadon.com](mailto:sales@celadon.com).**
